Please describe the impact to the age characteristic	This service is currently accessed by younger people aged 16-25 years old. These younger people will have some form of vulnerability (people with a Learning disability/Physical disabilities/mental health issues/issues pertaining to trauma). The service has focused on younger adults who need planning support to maintain their independence. The implementation of the savings proposal will impact this characteristic. There would be a negative impact in terms of quality and success of prevention services and the younger people being able to move into adulthood without reliance on more intensive services.
How will you mitigate against any negative impact to the age characteristic?	There will be a review of the Equality Impact Assessment following the service review. The younger person can still receive an adult Care Act support plan (if they meet the eligibility), or support from Preparing For Adulthood services (PFA) if they meet PFA criterion.
